Education

University of California, San Diego — San Diego, CA

B.S. in Cognitive Science (Design & Interaction), Minor in Computer Science — *Expected June 2028*

- **Relevant Coursework:** Systems Programming and Software Tools, Data Structures and Algorithms, Object Oriented Programming, Discrete Mathematics, Web Client Languages

Experience

San Diego SuperComputer Center – Funnel — San Diego, CA

Software Engineer Intern — *June 2026 – August 2026*

- Collaborated in an Agile development environment using GitLab to manage tasks, track progress, and deliver web app features across sprints
- Developed React/Next.js features for account creation, resume tailoring, and application tracking, enabling intuitive user navigation
- Translated Figma designs into responsive, reusable UI components using React and CSS, and Dockerized the application for cloud deployment

Google x Code2Career (BASTA) — Remote

Software Engineering Fellow — *September 2026 – Present*

- Selected for a competitive 10 week software engineering program featuring mentorship from a Google Software Engineer and technical interview preparation
- Strengthening data structures, algorithms, and problem solving skills through interview practice and career workshops

University of California, San Diego – SC&A — San Diego, CA

General Student Assistant — *May 2026 – Present*

- Digitized archival materials via Bookeye and High-Resolution scanners resulting in easy access of library materials
- Organized and re-shelved library materials while supporting staff projects and daily operations, maintaining an organized and accessible collection

Projects

Triton Lost and Found — July 2026 – Present

Java, Spring Boot, Flyway, PostgreSQL, Docker

- Built RESTful APIs for lost-and-found posts and claim workflows, enabling users to submit and manage claims
- Designed PostgreSQL schemas and managed migrations with Flyway, ensuring consistent database structure
- Structured the backend with controllers, repositories, entities, and DTOs, enabling clean and maintainable API design

Hackathon Winner – Earthquake Visualization Dashboard — April 2026

React, JavaScript, Google Maps API, HTML/CSS

- Built an interactive earthquake visualization dashboard, earning 3rd place in UCSD DataHacks' UI/UX Web Development Track among 100+ teams
- Integrated Google Maps API to deliver interactive seismic risk mapping and Street View features
- Developed React data visualizations and responsive UI components for earthquake analytics and risk analysis

ACM Hack Projects – UCSDelivery — November 2025 – January 2026

TypeScript, Express, MariaDB, Docker

- Developed REST APIs for product, cart, and order management using Express, enabling users to browse products and manage orders
- Implemented session-based authentication and role-based authorization for cart and order endpoints, ensuring secure access to user-specific data and actions
- Integrated MariaDB with parameterized SQL queries and developed in a Docker containerized environment

Technical Skills

Languages: Java, Python, C/C++, JavaScript/TypeScript, SQL, HTML/CSS
Libraries/Frameworks: Spring Boot, React, Express, Next.js, Node.js
Developer Tools: Git/GitHub, GitLab, VS Code, Unix/Linux, Docker, Flyway
